Our Programme Methodology

Our virtual Feasibility Programme is proving hugely popular because Smart Leaders want to ensure they have a workforce model that encompasses the right people, with the right skills, aptitudes at the right cost and time – so that their business is ready for the future challenges we will face.

We run 6 virtual modules that enable you to build your unique smart workforce model – so that your business is fit for the future. Each of the series of 6 modules is made up of 3 parts.

1. Pre-work

Short explainer sessions, Short Vimeo explainers and pre-reading materials, articles and so on (to match different learning style)

2. A live and interactive Zoom session

No longer than 1.5 hours facilitated by Ruth and Olly where we:

- consider the challenges we will face
- get to the root cause of past and future issues and
- begin to build your unique workforce model that matches customer demand
- align this with new leadership requirements of managing a distributed workforce

3. Post thinking, reflection and reading

The time to reflect on what we discuss on the Zoom Session and to build your plans for the future

In addition, we offer:

1. One to one coaching

With the Leader around the plan, policy and employment contracts and so on.

2. A unique Action Plan

A project plan ready for implementation

This format is proven to suit a variety of learning styles and will enable your team to reflect on the best options for your business once you get out of lockdown.

Work happens in Brains - not offices!

The Smart Working Revolution have 20 years' experience of delivering smart workforce models - including successful remote teams – we can deliver the right virtual skills training at the right time to your Remote Team
